COLD STORAGE SPACE
AND HOLDINGS REPORT
as of
SEPTEMBER 1, 1944

The storage situation as of September 1, 1944, was less critical than on August 1, 1944. Cooler occupancy was down 3 points while freezer occupancy remained the same. The relatively heavy decrease in cooler occupancy is accounted for by the heaviest August net out-movement of meats on record, and by an appreciable reduction of shell egg stocks. Freezer occupancy did not increase mainly because some half a million more cubic feet of space was held at freezer temperature on September 1 than on August 1.

On September 1, 1944, cooler occupancy was 81 percent. Some 1,981,000,000 pounds of commodities were stored in coolers of all warehouses. Apples, pears, and cheese began to move into coolers while shell eggs, meats, and lard moved out. The total weight of cooler commodities included 188 million pounds of hides, pelts and miscellaneous commodities.

Freezer occupancy of 89 percent reflected commodity holdings of 1,685,000 pounds. The major commodities moving into freezers during August were fruits and vegetables, creamery butter, poultry, lamb and mutton. The net increase of those commodities was 59.3 million pounds. Frozen eggs, frozen beef, frozen pork, and fish moved out of freezers during August.

The beginning of the apple and pear season brings the apple house space situation into prominence, with 246,000 bushels of apples and 3,921,000 bushels of pears in addition to other cooler commodities now stored in apple houses, the apple house cooler occupancy was 33 percent compared with an occupancy of 29 percent at the same time last year. Large quantities of commodities other than fresh fruits were shipped out of apple houses during August, releasing some space for the 1944 apple-pear crop.

Government holdings as reported for this month were gathered from the individual warehouses. They represent stocks owned by the armed forces and stored in warehouse space not owned or leased by them, and stocks owned by other government agencies.

FRESH FRUITS

Cold storage warehouses on September 1, 1944, held 246,000 bushels of apples, 3,921,000 bushels of pears and 39,896,000 pounds of other fresh fruits and vegetables. Pear holdings were 2,199,000 bushels heavier than those reported on September 1, 1943.

FROZEN FRUITS AND VEGETABLES

Frozen fruits and vegetables continued to move into storage during August. The net increase of frozen fruit and vegetable holdings, 38,090,000 pounds, was a third less than the increase of 56,825,000 during August of last year. Holdings of frozen fruits compared with last year were 62.2 million pounds greater. Frozen vegetable stocks of September 1 of this year were 20.2 million pounds greater than last year.

DAIRY AND POULTRY PRODUCTS

During August, the most significant change in the over-all dairy and poultry stocks held in cold storage warehouses was evident in the holdings of shell and frozen eggs and poultry. A total case equivalent of 2,126,000 cases of shell and frozen eggs moved out of storage during August. This out-movement was less than half as great as the movement during August of last year. Holdings on September 1 of this year were some 900,000 cases greater than at the same time last year. Holdings of dried eggs increased by 12.9 million pounds over the August 1 holdings.

The into-storage movement of poultry, 18.3 million pounds, was not so great during August 1944 as during the same month last year.

Total cheese holdings increased during August 4.9 million. This increase was reported as cheese other than American. Holdings of American cheese decreased during August.

Holdings of both plastic and fluid cream remained about the same as on August 1, there being only a slight decrease.

For Government holdings of the respective commodities consult the table below.

* Government Holdings are included in the total stocks. The figures do not include stocks held in space owned or leased by the armed forces. Figures for August 1, 1944 September 1, 1943 and the September 5-yr. average cover only DPMA and FSCC holdings as reported by those agencies.

1/ Frozen eggs are converted on the basis of 37.5 pounds to the case.

2/ 81 percent of total frozen eggs reported as of September 1, 1944 were classified as follows:
whites 14 percent; yolks 9 percent; and mixed 77 percent.

MEATS AND LARD

The change during August in the stocks of meats and lard is the most significant factor in the entire cold storage picture. A net out-of-storage movement of 166.9 million pounds of meats and 99 million pounds of lard occurred during August. This out-movement was noticeably heavier than the out-movement of any comparable period during recent years.

Of the 740.3 total meat stocks, 263.1 million pounds were reported stored in coolers and 477.2 million pounds in freezers.

Despite the heavy out-of-storage movement, meat stocks on hand September 1 this year were 15.5 million pounds greater than a year ago, and 168.4 million pounds greater than the 5-year (1939-43) average. Holdings of pork, however, were some seven and a half million pounds less than the holdings of the same month last year. Stocks of frozen and cured beef, lamb, mutton, and lard were heavier on September 1 of this year than they were for the same date a year ago, and for the five-year (1939-43) average.
